

# Mind Your Own Business Better™ Process

By combining the resources of our two companies, we built a unique 3-step process for manufacturing company owners to increase business value and be “transition ready” on their terms... when they want, for the money they need and to the successor of their choice.

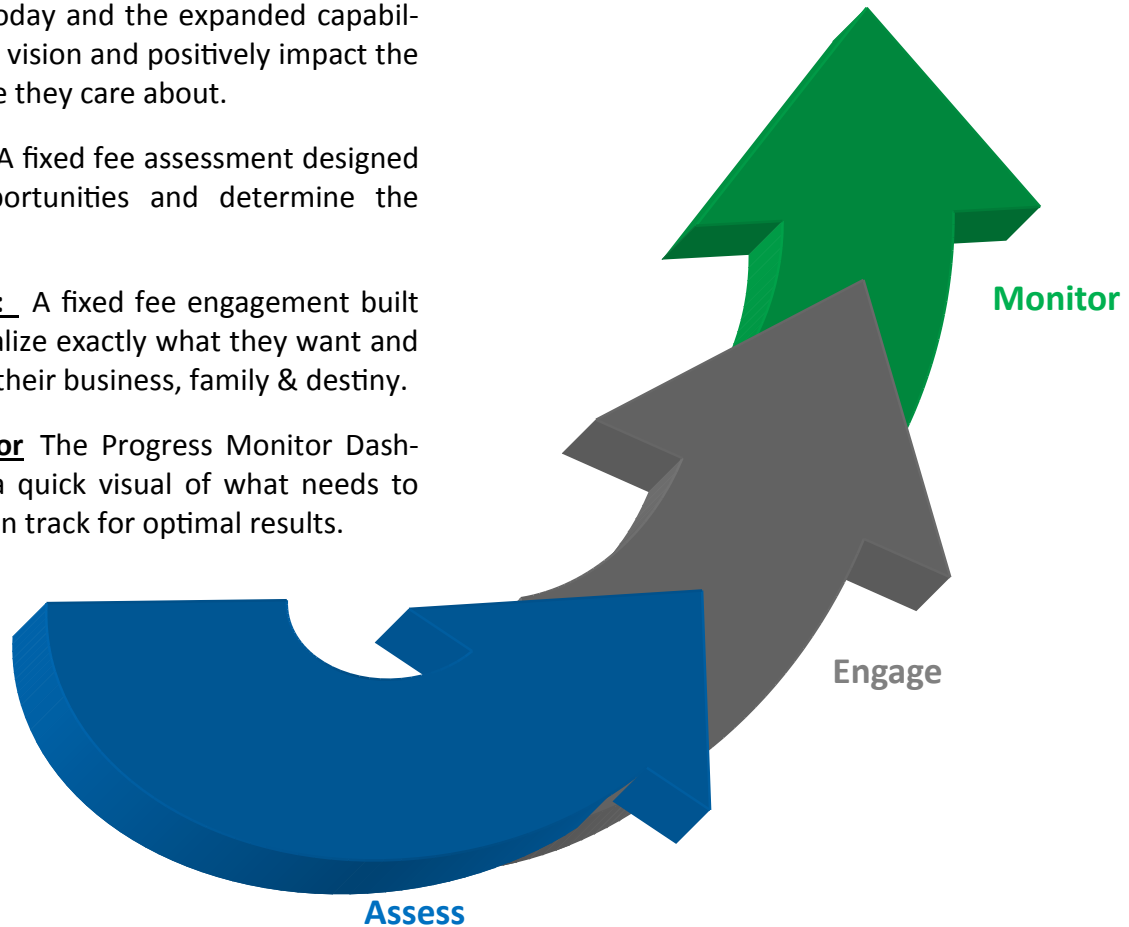

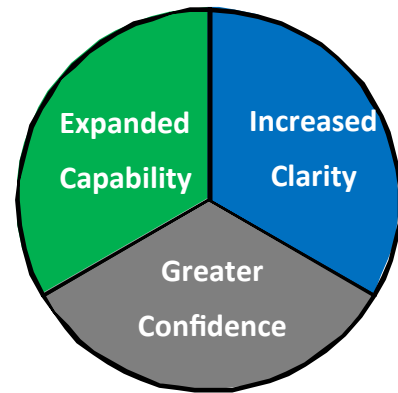

We serve our clients to imagine future possibilities, reverse engineer them, educate and build tailored solutions aligned with what is important to them.

The real benefit to our clients is increased clarity about their future, greater confidence about where they are today and the expanded capability to realize their vision and positively impact the events and people they care about.

**Phase I: Assess:** A fixed fee assessment designed to prioritize opportunities and determine the merits of Phase II.

**Phase II: Engage:** A fixed fee engagement built to help clients realize exactly what they want and stay in control of their business, family & destiny.

**Phase III: Monitor** The Progress Monitor Dashboard produces a quick visual of what needs to be done to stay on track for optimal results.

Imagine | Protect and Grow | Impact
